

Satellite radio is the best thing that has happened to radio since it was invented! I especially like the ability to have instant traffic and weather available on demand. This programming and the wide variety offered by satellite radio, which is not available elsewhere, which is a service for which I pay, is something I would not want to be denied because of political in fighting. Please reject the National Association of Broadcaster's petition 04-160 and allow this information and programming to be available to those who want it and are willing to pay for it.
